

Behaviour and Intervention Support Services for schools September 2019 – August 2020

St Albans Schools' Partnership offers a number of packages to support children, young people, adults and school staff through intensive programmes. Each support scheme will start with a referral from school, a conversation to discuss the intervention required and desired outcomes. Schools will be provided with an evaluation at the end of the intervention to discuss whether outcomes have been met and establish future service requirements. These Intervention Support Programmes can be tailor-made to suit each school.

This service is a Traded Service charged at £40 per session or £1200 for one hour each week for one year. Please find details below of the Behaviour and Intervention service provided by Stacy Holland, School Family Worker for Behaviour and Intervention:
